

DATA VORTEX 2026

Round 1 — Phase 2

Phase 2 Insight Report

Team name – akarshh2456

Objective

Evaluate platform engagement, user activity, and disproportionate engagement relative to follower count.

E3 — Average Engagement by Platform

- YouTube had the highest average total engagement at approximately 4,064.20.
- Platform comparison excludes Unknown.
- Average engagement provides a fairer comparison than raw post volume.

M3 — Most Active Users

- The top 10 users were identified by post count.
- user_zqv2vrf5 led with 22 posts and 90,796 total engagement.
- Combining activity and engagement shows both contribution volume and impact.

H4 — Follower-to-Engagement Anomaly

- 16 users met the criteria.
- These users have fewer than 5,000 followers but are in the top 10% by total engagement.
- They represent high-impact users with comparatively small audiences.

Overall Conclusion

The three questions collectively demonstrate aggregation, joins, ranking, window functions, and anomaly detection, while producing actionable views of platform and user behaviour.
